PROFILE

Purdue University Computer Science student pursuing software engineering internships, with experience developing database-backed web applications and troubleshooting Linux-based systems. Interested in backend and systems engineering, with hands-on experience in C, Python, Java, SQL, and JavaScript.

EDUCATION

Purdue University, College of Science | West Lafayette, IN

Expected May 2028

Bachelor of Science in Computer Science

Relevant Coursework: Programming in C, Programming in Java, Problem Solving and Object-Oriented Programming, Linear Algebra

PROFESSIONAL EXPERIENCE

AQ Management LLC | Digital Mining | Astana, Kazakhstan

Oct 2023 - Jan 2024

Software Systems Intern

- Supported reliable day-to-day operations for more than 35 employees by troubleshooting account, software, and workstation issues in a Linux-based digital-mining environment.
- Standardized responses to recurring technical issues by analyzing system logs and documenting repeatable resolution procedures.
- Improved internal recordkeeping by creating and maintaining more than 30 operational spreadsheets and technical documents.

PROJECTS AND LEADERSHIP

ForgeShell | C, Linux, POSIX, Make

- Applying low-level systems concepts by developing a command-line shell in C with built-in command dispatch for directory navigation, terminal control, and session management.
- Building a modular parsing and execution architecture designed to support external programs, I/O redirection, pipelines, background execution, and signal handling.

InternTrack | Python, Flask, SQLite, Bootstrap, Adzuna API

July 2026

- Centralized internship discovery and application tracking in one platform by building a Flask application with authentication and user-specific records.
- Expanded job-search functionality by integrating the Adzuna API for keyword and location-based queries and presenting results through responsive job cards.
- Improved application-data accuracy and visibility by implementing CRUD workflows, status filtering, duplicate prevention, a relational SQLite schema, and dashboard analytics.

Online Marketplace | Java | Team Project

Jan 2025 - May 2025

- Delivered account, product-listing, direct-messaging, and transaction workflows by collaborating on a team-developed Java marketplace application.
- Improved feature reliability and validation by modeling application entities with object-oriented design and performing integration testing.

Python and Mathematics Tutor

June 2023 - Present

- Strengthen students' programming and mathematical foundations by delivering individualized instruction in Python, algebra, and geometry.
- Address individual learning gaps by developing targeted lesson plans, coding exercises, and debugging practice covering control flow and functions.

TECHNICAL SKILLS

Languages: Java, C/C++, Python, SQL, JavaScript/TypeScript, HTML/CSS

Frameworks and Libraries: Flask, SQLite, Git, Linux, Valgrind, Bootstrap, Jinja2

Databases and Tools: SQLite, Git, GitHub, Linux, REST APIs, Make, Valgrind

CERTIFICATIONS

CS50x: Introduction to Computer Science, Harvard University - July 2026
